JUNGLE HOUSE
A native of tropical regions, calatheas plants are famous for their bright green or multicolor patterned foliage. They do well in low-light areas of the house but are finicky about temperature. Calatheas enjoy a temperature range of between 65° and 80°F—perfect for the indoor office or home setting—but need a humid environment, so take care to avoid dry air. Slow growers, calatheas seldom exceed 2 feet in height, making them easy to manage. Fertilize sparingly from spring through fall.
